# Weather & Tide Apps - Bring

- Waggoner tides and currents

- Ports and Passes
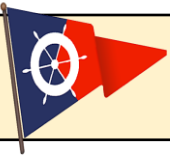

WELCOME to QYC Tech Talks!

- A Tech Talk is…

    - An <u>exchange</u> of information, ideas and experience

    - More discussion than "teaching"

    - A little structure

- We encourage…

    - Listening, learning & contributing

    - Discussion and debate

    - Questions

- Our next Tech Talk is:

    - Late 2019 or 2020
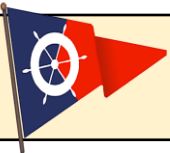

Together, to Learn From Each Other

Weather & Tide Apps

- Now for something completely different:

  - The new U.S. Customs and Border Protection (CBP) ROAM App can now be used when entering at state of Washington and Alaska Ports of Entry. Reporting Offsite Arrival – Mobile, ROAM App, can now be used at Washington pleasure craft Port Of Entry locations including Anacortes, Point Roberts, Friday Harbor, Roche Harbor, and Port Angeles. In Alaska the App can be used at Ketchikan and Wrangell Ports of Entry. This official CBP App will support Apple IOS and Google Android phones and tablet mobile devices. Travelers entering the U.S. can check-in with the App, and CBP officers can initiate a video chat for information verification, or an interview if required. If approved for entry, boaters do not have to report in-person at a Port of Entry.
